"Change your "spiritual emergency" into a spiritual awakening. Emma Bragdon explains the causes, dynamics, and potential benefits of life's transformative events."--Back cover

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

A reminder that some of the most important factors in healing are not high-tech marvels but ordinary factors such as love, compassion, friendship, and hope.

Is private ownership an inviolate right that individuals can wield as they see fit? Or is it better understood in more collective terms, as an institution that communities reshape over time to promote evolving goals? What should it mean to be a private landowner in an age of sprawling growth and declining biological diversity? These provocative questions lie at the heart of this perceptive and wide-ranging new book by legal scholar and conservationist Eric Freyfogle. Bringing together insights from history, law, philosophy, and ecology, Freyfogle undertakes a fascinating inquiry into the ownership of nature, leading us behind publicized and contentious disputes over open-space regulation, wetlands protection, and wildlife habitat to reveal the foundations of and changing ideas about private ownership in America. Drawing upon ideas from Thomas Jefferson, Henry George, and Aldo Leopold and interweaving engaging accounts of actual disputes over land-use issues, Freyfogle develops a powerful vision of what private ownership in America could mean—an ownership system, fair to owners and taxpayers alike, that fosters healthy land and healthy economies.

An illuminating profile of the San Francisco Bay Area, and its regional and global influence, as seen from the focal point of San Francisco International Airport (SFO). A People's History of SFO uses the history of San Francisco International Airport (SFO) to tell a multifaceted story of development, encounter, and power in the surrounding region from the eighteenth century to the present. In lively, engaging stories, Eric Porter reveals SFO's unique role in the San Francisco Bay Area's growth as a globally connected hub of commerce, technology innovation, and political, economic, and social influence. Starting with the very land SFO was built on, A People's History of SFO sees the airport as a microcosm of the forces at work in the Bay Area—from its colonial history and early role in trade, mining, and agriculture to the economic growth, social sanctuary, and environmental transformations of the twentieth century. In ways both material and symbolic, small human acts have overlapped with evolving systems of power to create this bustling metropolis. A People's History of SFO ends by addressing the climate crisis, as sea levels rise and threaten SFO itself on the edge of San Francisco Bay.

Tagg Holland, lead singer of the band Holland, is no stranger to the indulgent life of a rock idol. But when a one-night stand leads to a fatal accident, Tagg Holland leaves his celebrity behind and seeks life underground, running from everyone but the one person he can't outrun...Until Mara shows up at his door, training bag in hand. Suddenly life begins looking up for Tagg. With renewed hope, Tagg revisits his rock and roll life and attempts to rise above his old debaucheries...until another near-fatal accident threatens Tagg's resolve and sends him plummeting once again.With his emotional stability tinkering on the edge of another breakdown, will Tagg Holland be capable of finding his way back to the top...or will he be just another rock legacy who lived way too fast, dying way too young?

The inside story of the laptop that exposed the president's dirtiest secret. When a drug-addled Hunter Biden abandoned his waterlogged computer at a Mac repair shop in Delaware in the spring of 2019, just six days before his father announced his candidacy for the United States presidency, it became the ticking time bomb in the shadows of Joe Biden's campaign. The dirty secrets contained in Hunter's laptop almost derailed his father's presidential campaign and ignited one of the greatest media coverups in American history. This is the unvarnished story of what's really inside the laptop and what China knows about the Bidens, by the New York Post journalist who brought it into the open. It exposes the coordinated censorship operation by Big Tech, the media establishment, and former intelligence operatives to stifle the New York Post's coverage, in a chilling exercise of raw political power three weeks before the 2020 election. A treasure trove of corporate documents, emails, text messages, photographs, and voice recordings, spanning a decade, the laptop provided the first evidence that President Joe Biden was involved in his son's ventures in China, Ukraine, and beyond, despite his repeated denials. This intimate insight into Hunter's dissolute lifestyle shows he was incapable of holding down a job, let alone being paid tens of millions of dollars in high-powered international business deals by foreign interests, unless he had something else of value to sell—which of course he did. He was the son of the vice president who would go on to become the leader of the free world. Over 5,500 detailed biographies of the most eminent, talented and distinguished women in the world today.

In an era when the dominant ideology divided the world into separate public and private spheres and relegated women to the private, Anna J. Hardwicke Pennybacker ardently promoted progressive causes including public education, women's suffrage, social reform, and the League of Nations. A Texas educator, clubwoman, writer, lecturer, and social and political activist whose influence in the early twentieth century extended nationwide, Pen-

nybacker wrote A New History of Texas, which was the state-adopted textbook for Texas history from 1898–1913 and remained in classroom use until the 1940s. She was also active in the burgeoning women's club movement and served as president of both the Texas Federation of Women's Clubs and the General Federation of Women's Clubs (1912–14). The latter position was considered by some to be the most powerful position for a woman in America at that time. Kelley King has mined the fifty-two linear feet of Pennybacker archives at the University of Texas Center for American History to reconstruct the "hidden history" of a feminist's life and work. There, she uncovered an impressive record of advocacy, interlaced with a moderate style and some old-fashioned biases. King's work offers insight into the personal and political choices Pennybacker made and the effects these choices had in her life and on the American culture at large.

Between 1846 and 1873, California's Indian population plunged from perhaps 150,000 to 30,000. Benjamin Madley is the first historian to uncover the full extent of the slaughter, the involvement of state and federal officials, the taxpayer dollars that supported the violence, indigenous resistance, who did the killing, and why the killings ended. This deeply researched book is a comprehensive and chilling history of an American genocide. Madley describes pre-contact California and precursors to the genocide before explaining how the Gold Rush stirred vigilante violence against California Indians. He narrates the rise of a state-sanctioned killing machine and the broad societal, judicial, and political support for genocide. Many participated: vigilantes, volunteer state militiamen, U.S. Army soldiers, U.S. congressmen, California governors, and others. The state and federal governments spent at least \$1,700,000 on campaigns against California Indians. Besides evaluating government officials' culpability, Madley considers why the slaughter constituted genocide and how other possible genocides within and beyond the Americas might be investigated using the methods presented in this groundbreaking book.

The politics of food, land, and labor are examined through this anthropological study of American artisanal cheesemaking.

Most California histories begin with the arrival of the Spanish missionaries in the late eighteenth century and conveniently skip to the Gold Rush of 1849. Noticeably absent from these stories are the perspectives and experiences of the people who lived on the land long before European settlers arrived. Historian William Bauer seeks to correct that oversight through an innovative approach that tells California history strictly through Native perspectives. Using oral histories of Concow, Pomo, and Paiute workers, taken as part of a New Deal federal works project, Bauer reveals how Native peoples have experienced and interpreted the history of the land we now call California. Combining these oral histories with creation myths and other oral traditions, he demonstrates the importance of sacred landscapes and animals and other nonhuman actors to the formation of place and identity. He also examines tribal stories of ancestors who prophesied the coming of white settlers and uses their recollections of the California Indian Wars to push back against popular narratives that seek to downplay Native resistance. The result both challenges the ♦California story♦ and enriches it with new voices and important points of view, serving as a model for understanding Native historical perspectives in other regions.

To Margie Sievers, life in Duluth, Minnesota is a wonderful mixture of excitement and security. Duluth is a city on the rise with everything from simple community gatherings to grand galas in gilded ballrooms. Rich Europeans and Eastern Americans spend summers in their elegant homes along the cool shores of Lake Superior. On Hunter's Hill near her home Margie sketches her dress designs, hoping to publish them in the fashion magazines of the day and to see them transformed from paper to fabric. Into her secure, happy world rides Roman Greyson, a friendly, confident Englishman whose smile leaves level-headed Margie unaccountably flustered. Over the next two years they become good friends, but are they more? And is there a place for him in the plans she has so carefully made on Hunter's Hill?

Stanford examines great ape behavior and hunter-gatherer societies to support his hypothesis that the hunting, eating and sharing of meat drove human evolution.

Lists institutions in the United States and its outlying areas that offer at least a 2-year program of college-level studies in residence or, if nonresident in nature, that are accredited or pre-accredited by an accrediting agency recognized for such purpose by the U.S. Commissioner of Education.

The Evolution of Human Pair-Bonding, Friendship, and Sexual Attraction presents an evolutionary history of romantic love, male-female pair-bonding, same-sex friendship, and sexual attraction, drawing on sexuality research, gay and lesbian studies, history, literature, anthropology, and evolutionary science. Employing evolutionary theory as a framework, close same-sex friendship is examined as an adaptive trait that has harnessed love, affection, and sexual pleasure to navigate same-sex environments for both men and women, ultimately benefiting their reproductive success and promoting the inheritance of traits for friendship. Chapters consider the desire to form close same-sex friendships and ask if this is embedded in our biology, concluding that most humans have the capacity to form loving, meaningful, and sexual relationships with men and women. This book takes on a unique interdisciplinary approach and is essential reading for those studying and working in sexuality research, anthropology, sociology, evolutionary psychology, and gay and lesbian studies. It will also be of interest to marriage and family therapists as well as sex therapists.

The first modern account of Theodore Roosevelt and the First World War, this is a tale of war and politics as well as the private story of true love and

family devotion: a story as multi-faceted as TR's own personality.

Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (July - December)

Cali Parker is poor. She has a lot on her plate - her father is dying, she's working to help pay the rent, and she's two-years behind in college. Griffin Brooks is rich. He has not a care in the world - he's acing his engineering courses, his hobby is restoring his fifty-thousand dollar classic car, and he

has a different girl on his arm every week. When Cali sees Griffin on her first day of class, she's immediately smitten and thinks she's found the perfect guy. When Griffin sees Cali at the bank, he immediately forgets the blonde he was with that morning. Then they meet, and their worlds collide. Cali doesn't belong in Griffin's world, and he doesn't understand hers. But just when Griffin convinces Cali that their two different worlds can blend, a secret is revealed that tears them apart. Is their love strong enough to bring them back together, or will their worlds drift further apart?
