Biology Chapter 34: Assessment Flashcards | Quizlet

Chapter 34 Animal Behavior by - Prezi  
 make an organism change its behavior. Internal stimuli tell an  
 animal what is occurring in its own body. For example, • Hunger  
 signals a need for more energy and causes an animal to search  
 for food. • Thirst signals a loss of internal fluid and causes an  
 animal to look for water. • Pain warns an animal that some part

of its body may be subject
