In test driven development, you first write an executable test of what your application code must do. Only then do you write the code itself and, with the test spurring you on, you improve your design. In acceptance test driven development (ATDD), you use the same technique to implement product features, benefiting from iterative development, rapid feedback cycles, and better-defined requirements. TDD and its supporting tools and techniques lead to better software faster. Test Driven brings under one cover practical TDD techniques distilled from several years of community experience. With examples in Java and the Java EE environment, it explores both the techniques and the mindset of TDD and ATDD. It uses carefully chosen examples to

illustrate TDD tools and design patterns, not in the abstract but concretely in the context of the technologies you face at work. It is accessible to TDD beginners, and it offers effective and less well-known techniques to older TDD hands. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book. What's Inside Learn hands-on to test drive Java code How to avoid common TDD adoption pitfalls Acceptance test driven development and the Fit framework How to test Java EE components-Servlets, JSPs, and Spring Controllers Tough issues like multithreaded programs and data access code

During the French Revolution, traditional literary forms such as the sentimental novel and the moral tale dominate literary production. At first glance, it might seem that these texts are unaffected by the upheavals in France; in fact they reveal not only a surprising engagement with politics but also an internalised emotional response to the turbulence of the period. In this innovative and wide-ranging study, Katherine Astbury uses trauma theory as a way of exploring the apparent contradiction between the proliferation of non-political literary texts and the events of the Revolution. Through the narratives of established bestselling literary figures of the Ancien Regime (primarily Marmontel, Madame de Genlis and Florian), and the early works of first generation Romantics Madame de Stael and Chateaubriand, she traces how the Revolution shapes their writing, providing an intriguing new angle on cultural production of the 1790s. Katherine Astbury is Senior Lecturer in French Studies at the University of Warwick.

A Companion to the French Revolution comprises twenty-nine newly-written essays reassessing the origins, development, and impact of this great turning-point in modern history. Examines the origins, development and impact of the French Revolution Features original contributions from leading historians, including six essays translated from French. Presents a wide-ranging overview of current historical debates on the revolution and future directions in scholarship Gives equally thorough treatment to both causes and outcomes of the French Revolution

Why have the great revolutionary leaders of modern times from Robespierre to Lenin and Mao Tse-tung so often been ascetics, austere "puritans" with few emotional ties? What functions, political as well as personal, do these ascetic traits perform for the modern revolutionary leader and for his followers? Noted historian and author Bruce Mazlish is convinced that, beginning in the nineteenth century, the needs of modernizing revolutions have produced a distinct new type of political leader, the revolutionary ascetic. This individual's denial of personal pleasures and commitments both enables him to perform politically necessary, if personally repulsive, revolutionary acts, and to command the allegiance of his more worldly followers. Starting with Cromwell and the religious ascetics of the Puritan Revolution, Mazlish shows, in a series of fascinating personality sketches, how this asceticism first became secularized with the French Revolution and then in the nineteenth and twentieth centuries was put to the service of a new kind of "total" modernizing revolution in Russia, China, and elsewhere. In two remarkably vivid portraits of Lenin and Mao Tse-tung, Mazlish shows us precisely how two of the century's best-known revolutionaries consciously and unconsciously used their personal asceticism to induce revolutionary change.

Unleash powerful teaching and the science of learning in your classroom Powerful Teaching: Unleash the Science of Learning empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute—without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With Powerful Teaching, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom Powerful Teaching: Unleash the Science of Learning is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge

and evidence-based tools, turn your teaching into powerful teaching and unleash student learning in your classroom.

The French Revolution was the scene of much intellectual and social upheaval. Its impact touched a wide range of subjects: the relationship of the church to the state, social relationships, science, literature, fashion, philosophy and theology. Although the French Revolution's momentum was felt across Europe and North America, it met a particularly interesting response in the Netherlands, at that time the scene of a burgeoning neo-Calvinist movement. In that context, the likes of Groen van Prinsterer, Abraham Kuyper and Herman Bavinck responded to the French Revolution's ideals and influence in a variety of intellectual and practical ways. This book approaches that Dutch response from a range of historical and theological perspectives, and in so doing explores the relationship between the French Revolution and the development of neo-Calvinism. Beginning with historical portraits of Bavinck and Kuyper in relation to the Revolution, the perspectives offered also include, amongst others, the place of multilingualism in neo-Calvinism and the Revolution, neo-Calvinist and Revolutionary approaches to fashion, a dialogue between Kuyperian theology and Kieslowski's *Three Colours* trilogy, and a contemporary neo-Calvinist critique of French laïcité. This book forms part of a wider Project neo-Calvinism supported by the Theologische Universiteit Kampen and the VU University Amsterdam.

A groundbreaking study of the role of Muslims in eighteenth-century France From the beginning, French revolutionaries imagined their transformation as a universal one that must include Muslims, Europe's most immediate neighbors. They believed in a world in which Muslims could and would be French citizens, but they disagreed violently about how to implement their visions of universalism and accommodate religious and social difference. Muslims, too, saw an opportunity, particularly as European powers turned against the new French Republic, leaving the Muslim polities of the Middle East and North Africa as France's only friends in the region. In *Muslims and Citizens*, Collier examines how Muslims came to participate in the political struggles of the revolution and how revolutionaries used Muslims in France and beyond as a test case for their ideals. In his final chapter, Collier reveals how the French Revolution's fascination with the Muslim world paved the way to Napoleon's disastrous invasion of Egypt in 1798.
