Foundations of Crime Analysis: Data, Analyses, and Mapping ...

Introductory Guide to Crime Analysis and Mapping

Much of crime mapping is devoted to detecting high-crime-density areas known as hot spots. Hot spot analysis helps police identify high-crime areas, types of crime being committed, and the best way to respond. This report discusses hot spot analysis techniques and software and identifies when to use each one.

Crime Analysis An additional set of analytical services can be provided in order to have a deeper understanding of criminal pattern within an area. Aside from Hot-Spot mapping, which lets us visualize which areas have significantly high and/or low crime, other methods can be implemented to study the data.

Crime mapping is a very important tool in managing and controlling crime in an area. By analysing the spatial and temporal data provided by maps investigator are able to understand the crime...

The analysis shows area of crime hotspots, areas deficient in security outfit, areas requiring constant police patrol, time and days when citizens face the maximum crime and of what type.

Crime Analysis with Crime Mapping, Third Edition continues to provide a basic introduction to the field of crime analysis for students and practitioners, covering its history, key concepts, data, and techniques.

Crime Analysis with Crime Mapping | Online Resources
Law enforcement agencies perform crime analysis to reduce crime; improve operations; and make smarter, data-driven decisions. Crime analysts leverage modern crime mapping software and spatial analysis tools to deliver the information that police officers and command staff need to make informed decisions. The ArcGIS platform has become easier than ever to use, so you will spend less time preparing data and more time enabling decision-making.

Crime Analysis | Crime Mapping Software for Law Enforcement
Crime mapping identifies not only where the actual crime took place, but also looks at where the perpetrator “lives, works, and plays” as well as where the victim “lives, works, and plays.” Crime analysis has identified that the majority of criminals tend to commit crimes within their comfort zones, and crime mapping is what allows police and investigators to see where that comfort zone might be.
