This book is for anyone looking for enlightenment which is simple once you know what it is. It's to see yourself as the pure being you are away from everything you've ever been brainwashed by. Sounds simple but many people live an entire lifetime and not realize they are pure beings with their own true natures who do not owe anything to the people or the society around them except to pay bills and follow the laws. Most misery comes from not being who you are in your natural state. Watch any animal. Cage him up, he gets depressed and angry. Let him be free and he's happy. Most of us grow up to be slaves to some artificial value then wonder why we're not happy. The first slavery is to your family. Your father has expectations for you. He wants what is good for you but if he was a truly enlightened father, he would let you live your own life and not push you into the path he wants for you. My second slavery was to my Catholic reli-

gion which was not all that bad. It gave me a sense of community and morals but at sixteen, I went to confession then realized that was kind of silly, me a grown man, confessing my sins to another grown man. I still believe in the community the church offers but my relationship to God is direct. No middle man intervenes. I was brought up in a capitalist-pop culture neighborhood in Halifax, Canada. We were into the Beatles and pinball. Everything was about working, business, making money, buying stuff, getting ahead in the capitalist sense. There is more to life than money. There should come a point when you ask yourself what can I do to make me happy beyond these material things I'm surrounded by. I went to a Catholic elementary school where we pledged allegiance to the Queen and listened to the national anthem Oh Canada every day. Rereading America remains the most widely adopted book of its kind because it works: instructors tell us time and again that they've watched their students grow as critical thinkers and writers as they grapple with cross-curricular readings that not only engage them, but also challenge them to reexamine deeply held cultural assumptions, such as viewing success solely as the result of hard work. Extensive apparatus offers students a proven framework for revisiting, revising, or defending those assumptions as students probe the myths underlying them. Rereading America has stayed at the forefront of American culture, contending with cultural myths as they persist, morph, and develop anew. The tenth edition, developed with extensive input from users, features a refreshed collection of readings with a new chapter that introduces students to one of the most pervasive myths of our time: technological innovation fosters a more equal society. Also in response to instructors' requests for more writing instruction, there

are now more questions that help students apply to their own writing the strategies used in the readings.

Whether in movies, cartoons, commercials, or even fast food marketing, psychology and mental illness remain pervasive in popular culture. In this collection of new essays, scholars from a range of fields explore representations of mental illness and disabilities across various media of popular culture. Contributors address how forms of psychiatric disorder have been addressed in film, on stage, and in literature, how popular culture genres are utilized to communicate often confusing and conflicted relationships with the mentally ill, and how popular cultures around the world reflect mental illness and disability. Analyses of sources as disparate as the *Batman* films, Broadway musicals and Nigerian home movies reveal how definitions of mental illness, mental health, and of psychology itself intersect with discourses on race, gender, law, capitalism, and globalization. This book clarifies the idea of critical thinking by investigating the 'critical' practices of academics across a range of disciplines. Drawing on key theorists - Wittgenstein, Geertz, Williams, Halliday - and using a 'textographic' approach, the book explores how the concept of critical thinking is understood by academics and also how it is constructed discursively in the texts and practices they employ in their teaching. Critical thinking is one of the most widely discussed concepts in debates on university learning. For many, the idea of teaching students to be critical thinkers characterizes more than anything else the overriding purpose of 'higher education'. But whilst there is general agreement about its importance as an educational ideal, there is surprisingly little agreement about what the concept means exactly. Also at issue is how and what students need to be taught in order to be properly critical in

their field. This searching monograph seeks answers to these important questions.

This is a very good textbook for an introductory course in research methods. I like that its focus is on psychological research specifically." —Angela M. Heads, Prairie View A&M University

Few sociologists have commanded a larger readership than Erving Goffman. From his first book, *The Presentation of Self In Everyday Life* (1956), to his last, *Forms of Talk* (1981), his publications were eagerly awaited and his ideas widely discussed. In 1982 when he died at the age of 60, the response was that a figure of outstanding importance had left the stage of modern sociology. In this powerful study, Tom Burns provides a meticulous and incomparable examination of Erving Goffman's work. Burns arranges Goffman's writings into a series of themes such as 'Social Order', 'Acting Out', 'normalisation', 'abnormalisation', 'grading and discrimination' and 'realms of being'. This is a useful device because it brings out the richness and diversity of Goffman's preoccupations. This richness and diversity is often lost in secondary accounts which insist on labelling Goffman as a 'micro-sociologist' or 'symbolic interactionist'. In a painstaking and accurate discussion Burns shows the meaning and application of Goffman's key concepts. He also guides the reader in the direct influences upon Goffman's thought. He shows more clearly than anyone else how Goffman was influenced by Durkheim, Simmel, the Chicago School, animal ethology and linguistic philosophy. The book ends with a crisp and incisive critical assessment of Goffman's sociology.

Keywords in Writing Studies is an exploration of the principal ideas and ideals of an emerging academic field as they are constituted by its specialized vocabulary. A sequel to the 1996 work *Keywords in Composition Studies*, this new volume traces the evolution of the field's lexicon, taking into account the wide variety of theoretical, educational, professional, and institutional developments that have redefined it over the

past two decades. Contributors address the development, transformation, and interconnections among thirty-six of the most critical terms that make up writing studies. Looking beyond basic definitions or explanations, they explore the multiple layers of meaning within the terms that writing scholars currently use, exchange,

and question. Each term featured is a part of the general disciplinary parlance, and each is a highly contested focal point of significant debates about matters of power, identity, and values. Each essay begins with the assumption that its central term is important precisely because its meaning

is open and multiplex. Keywords in Writing Studies reveals how the key concepts in the field are used and even challenged, rather than advocating particular usages and the particular vision of the field that they imply. The volume will be of great interest to both graduate students and established scholars.
