DKEFS Sample Report - pearsonclinical.com.au

The Delis-Kaplan Executive Function System (D-KEFS) is the first standardized set of tests to evaluate higher-level cognitive functions in both children and adults. The tests assess vital executive functions such as flexibility of thinking, inhibition, problem solving, planning, impulse control, concept formation, abstract thinking, and creativity in both verbal and spatial modalities.

Delis-Kaplan Executive Function System™ (D-KEFS™)

The Delis-Kaplan Executive Function System is a neuropsychological test used to measure a variety of verbal and nonverbal executive functions for both children and adults. This assessment was developed over the span of a decade by Dean Delis, Edith Kaplan, and Joel Kramer, and it was published in 2001. The D-KEFS comprises nine tests that were designed to stand alone. Therefore, there are no aggregate measures or composite scores for an examinee's performance. A vast majority of these ...
