Enterprise Governance of Information Technology ...

Going well beyond the implementation of a superior IT infrastructure, enterprise governance of IT is about defining and embedding processes and structures throughout the organization that enable boards and business and IT people to execute their responsibilities in support of business/IT alignment and value creation from their IT-enabled investments.

At the forefront of the field, the authors of this volume draw from years of research and advising corporate clients to present a comprehensive resource on enterprise governance of IT (EGIT). Information technology (IT) has become a crucial enabler in the support, sustainability and growth of enterprises. Given this pervasive role of IT, a specific focus on EGIT has arisen over the last two decades, as an integral part of corporate governance.

Conceiving the model for Enterprise Governance of IT is the first step, deploying it throughout all levels of the organization is the next challenging step. To achieve this, Enterprise Governance of IT can be deployed using a mixture of various structures, processes, and relational mechanisms.

Information technology governance is a subset discipline of corporate governance, focused on information technology and its perfor-

mance and risk management. The interest in IT governance is due to the ongoing need within organizations to focus value creation efforts on an organization's strategic objectives and to better manage the performance of those responsible for creating this value in the best interest of all stakeholders.
