Environmental taxes in the EU. In 2018, the governments in the EU collected environmental tax revenue of EUR 324.6 billion. The value represents 2.4 % of the EU gross domestic product (GDP) and 6.0 % of the EU total government revenue from taxes and social contributions ('TSC') (see Table 1).. Table 1 presents the breakdown of environmental tax revenue by type of tax and payer.

CARBON TAX GUIDE - CBD

There has been considerable debate as to whether

the revenue-neutral substitution of environmental taxes for ordinary income taxes might offer a double dividend: not only (1) improve the environment but also (2) reduce certain costs of the tax system. This paper articulates different notions of double dividend and examines the theoretical and empirical evidence for each.

Environmental taxation and the double dividend: A reader's ...

This claim is easily defended on theoretical grounds and (thankfully) receives wide support from numerical simulations. The stronger versions contend that revenue-neutral swaps of environmental taxes for ordinary distortionary taxes involve zero or negative gross costs. Analyses of numerical results tend to cast doubt on the strong double dividend claim. Yet the theoretical case against the strong ...

Environmental Taxation and the "Double Dividend:" a Reader ...

Downloadable! In recent years there has been great interest in the possibility of substituting environmentally motivated or 'green' taxes for ordinary income taxes. Some have suggested that such revenue-neutral reforms

might offer a 'double dividend:' not only (1) improve the environment but also (2) reduce certain costs of the tax system. This paper articulates different notions of 'double ...
