Whether you're a full-time trader looking to make a living or a part-time trader looking to make some extra money, the foreign exchange (forex) market has what you desire--the potential to make sizeable profits and 24/7 accessibility. But to make it in today's forex market, you need more than a firm understanding of

the tools and techniques of this discipline. You need the guidance of someone who has participated, and prevailed, in this type of fast-paced environment. Raghee Horner has successfully traded in the forex market for over a decade, and now, in *Thirty Days of Forex Trading*, she shares her experiences in this field by chronicling one full month of trading real money. First, Horner introduces you to the tools of the forex trade, and then she moves on to show you exactly what she does, day after day, to find potentially profitable opportunities in the forex market. Part instructional guide, part trading journal, *Thirty Days of Forex Trading* will show you--through Horner's firsthand examples--how to enter the forex market with confidence and exit with profits.

Many individuals enter financial markets with the objective of earning a profit from capitalizing on price fluctuations. However, many of these new traders lose their money in attempting to do so. The reason for this is often because these new traders lack any fundamental understanding of financial markets, they cannot interpret any data, and they have no strategy for trading. Trading in markets is really about deploying strategies and managing risks. Indeed, successful traders are those who have strategies which they have proved to be consistent in granting them more financial gains than financial losses. The purpose of this book is to help a potentially uninformed retail trader or inquisitive reader understand more about financial markets, and assist them in gaining the technical skills required to profit from trading. It represents a beginner's guide to trading, with a core focus on stocks and currencies.

Have you ever ask yourself about day trading and what it has to offer you? Have you ever wondered how many people have found success with day trading as a full-time income? Have you ever thought to improve your finances and create wealth... then keep reading. With the arrival of the internet, a new form of trading has become very popular. It is called day trading or intraday trading, where people buy or sell stocks, currencies, or commodities within a single trading session. Before anyone decides to become a day trader, they must understand, it is not a get-rich-quick scheme, nor it is a 9 to 5 job where they can earn a fixed income. To earn profits from day trading, it is essential to have a good working knowledge of how stock markets function and what tools are essential for intraday trading. The basic concept of day trading is like investing. The only difference being a shorter time frame for purchasing or selling any entity in financial markets. Day traders are not bothered about fundamental analysis of any company, but they take the help of a technical analysis of stocks for short-term, intraday trading. With the ever-growing popularity of this type of trading, brokerage houses have started giving margin facilities where anyone can buy or sell stocks or any other security with a fraction of the actual cost of trading. For day traders, short-term events are very important; such as companies' earnings, or geopolitical events, which can trigger high volatility in stock markets. People frequently ask; how much a day trader can earn? No certain data is available about that, but most of the people make losses and only a handful of traders are successful in earning money by day trading. Many successful traders have written books about their methods and they emphasize, that knowledge about stock markets and self-discipline are crucial if one wants to earn a living by day trading. Instead of focusing only on profits, if day traders focus on trading in the right way, they will be more successful in this field. A few things separate successful traders from those, who miserably fail in stock markets. Those who succeed in day trading, go about it in a professional manner. They spend their time and money in learning and acquiring knowledge about trading. They also exhibit plenty of patience and wait for the right time to trade. The successful traders are impatient, and instead of knowledge-based trading, they believe in their gut

feeling about markets. Successful traders also manage their money very carefully and are cautious about risk and reward ratio of their trades. Before trading, such professional traders spend time in preparing a systematic plan and follow it.
