13C - DUNN TRAVIS

Here are the speakers we need to set up: (2) CQ-1 (wide coverage main), (2) 650-P (2x 18-inch sub) in an uncoupled symmetrical point destination array. It's your standard left/right mains situation (see diagram below). This is the most common professional sound system setup that I run into; it is not good or bad, just common.

Professional Sound System Setup In 15 Minutes

A soundboard (also known as a Mixing Board, Mix Console or Sound Desk) is a complex and sometimes intimidating piece of equipment. Here is a very basic guide to setting up a mixing board for a small live show with a basic bare bones PA system setup.

Young Gardener | mercury.wickedlocal

Perform a quick sound check to set the microphone and speaker levels. Place mics 1-2" away for voices and 4 - 5" away from acoustic instruments. Rely on the acoustic sound of the performer and reinforce their sound with the PA system. Two main speakers provide wider coverage for larger spaces or audiences.

Live Streaming Equipment List: How to Create Your Ideal Setup

Live Sound Setup Diagram Expedientlutions

I am needing to run sound for a 5 piece classic rock band for a festival this summer. It is an outdoor event on a raised stage (3 ft). I need some setup advice on how to setup my complete live sound system. I have a Behringer PMP6000 analog mixer. 20 channels. A 12 channel snake. I have a QSC 2 channel amp (1,000 watts x 2).

Live Sound 101: Sound System Design and Setup for a Live ...

The cables used to connect components of a sound system have three wires (conductors), similar to the three prong plug used to supply power to grounded electrical equipment. The electrical circuit used to pass a signal between sound equipment is 'balanced'. This means that two of the three conductors are dedicated to carrying the 'hot' and 'cold' path for the circuit carrying the ...

Live Sound Explained: 3. The PA System (Signal Flow ...

Occasionally, more than 2 subwoofers are required for a gig, in which case, you'll need to use a speaker management system. These usually include lots of DSP (digital signal processors) like EQ, compression, limiting and stereo imaging: but most importantly, they allow you to split a stereo signal to eight or more outputs, which gives you the freedom to include multiple subs.
