The third part of Neurological Disorders in Famous Artists presents painters, musicians, and writers who had to fight against an acute or chronic neurological disease. Sometimes this fight was without success (e.g. Shostakovich, Schumann, Wolf, Pascal), but often a dynamic and paradoxical creativity of the clinical disorder was integrated into their artistic production (e.g. Klee, Ramuz).

This chapter focuses on anecdotal reports of various neurological disorders and their potential consequences on works produced by famous or well-established artists, including Carl Frederik Reuter-sward, Giorgio de Chirico, Krystyna Habura, Leo Schnug, Ignatius Brennan, and many others.

The study of how a neurological disorder can change the artistic activity and behavior of creative people is a largely unexplored field. This publication looks closer at famous painters, writers, composers and philosophers of the 18th to the 20th centuries who suffered from neurological diseases such as stroke, epilepsy, brain trauma and dementia.
