L'impressionnante croissance économique de la Chine, des BRICS et des MIST s'est accompagnée de la montée de firmes multinationales émergentes ou "global challengers". Telle a été l'origine du projet "Globalization, National Patterns of Development and Strategies of Firms, XIXth-XXIth Centuries", retenu au 22e Congrès international des Sciences historiques de Jinan. Les politiques économiques des états sont en effet étroitement liées à la multinationalisation des firmes comme le montrent l'exemple des compagnies à chartes, ou celui des petits pays (Finlande, Suisse) en tant qu'acteurs de la Mondialisation.

Are job losses and the degradation of working conditions in the developed world due to globalization and the offshoring of jobs? Contrary to popular beliefs and fears, most economic analysis evaluating the long-term and global implications of the internationalization of employment does not support this view. Yet for workers who have been displaced, a positive global impact does not remove their immediate loss. This study discusses a paradox: globalization may have enhanced the overall well-being of those coun-

tries that have participated, and reduced poverty worldwide, but it looks more and more like a monster that devours jobs, as there are few mechanisms to compensate those that have suffered. The book analyzes trends and patterns in the internationalization of employment, looks at losers and winners, and proposes new policies of compensation.

What happens when the powerful, cultured and noble monarch of a small, reclusive and technologically advanced African kingdom comes to America ... and finds himself partnered with a fast-talking government spin doctor? King T'Challa of Wakanda, the coolly unflappable and cunning creature of the night known as the Black Panther, takes both global politics and street-level punks by storm in a critically acclaimed collection that reels from intense political drama to wild adventure to hilarious social commentary on the Marvel Universe.

At the height of its power, the Roman Empire encompassed the entire Mediterranean basin, extending much beyond it from Britain to Mesopotamia, from the Rhine to the Black Sea. Rome prospered for centuries while successfully resisting attack, fending off everything from overnight robbery raids to full-scale invasion attempts by entire nations on the move. How were troops able to defend the Empire's vast territories from constant attacks? And how did they do so at such moderate cost that their treasury could pay for an immensity of highways, aqueducts, amphitheaters, city baths, and magnificent temples? In *The Grand Strategy of the Roman Empire*, seasoned defense analyst Edward N. Luttwak reveals how the Romans were able to combine military strength, diplomacy, and fortifications to effectively respond to changing threats. Rome's secret was not ceaseless fighting, but comprehen-

sive strategies that unified force, diplomacy, and an immense infrastructure of roads, forts, walls, and barriers. Initially relying on client states to buffer attacks, Rome moved to a permanent frontier defense around 117 CE. Finally, as barbarians began to penetrate the empire, Rome fielded large armies in a strategy of "defense-in-depth," allowing invaders to pierce Rome's borders. This updated edition has been extensively revised to incorporate recent scholarship and archeological findings. A new preface explores Roman imperial statecraft. This illuminating book remains essential to both ancient historians and students of modern strategy.

This book explores the emerging forms and functions of contemporary mobile borders. It deals with issues of security, technology, migration and cooperation while addressing the epistemological and political questions that they raise. The 'borderities' approach illuminates the question of how borders can be the site of both power and counter-power.

Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

For more than fifteen years, Nomadic Subjects has guided discourse in continental philosophy and feminist theory, exploring

the constitution of contemporary subjectivity, especially the concept of difference within European philosophy and political theory. Rosi Braidotti's creative style vividly renders a productive crisis of modernity. From a feminist perspective, she recasts embodiment, sexual difference, and complex concepts through relations to technology, historical events, and popular culture. This thoroughly revised and expanded edition retains all but two of Braidotti's original essays, including her investigations into epistemology's relation to the "woman question;" feminism and biomedical ethics; European feminism; and the possible relations between American feminism and European politics and philosophy. A new piece integrates Deleuze and Guattari's concept of the "becoming-minoritarian" more deeply into modern democratic thought, and a chapter on methodology explains Braidotti's methods while engaging with her critics. A new introduction muses on Braidotti's provocative legacy.

This book discusses several product development strategies and tools employed by organizations around the world to implement frugal innovations. Over the past decade, frugal innovations have caught the attention of countless management scholars. This book comes at the right time for academics and practitioners alike, as it explores how the concept of frugal innovation has evolved over the past several years and is shifting its focus from merely featuring 'cost' driven innovations to being more 'resourceful' and 'sustainable' at its core. Furthermore, in light of the ongoing digital revolution and emergence of new business models such as sharing economy and circular economy, the book highlights recent and upcoming trends and their impacts on frugal innovation strategies.

After a period of post-war austerity, in 1957 Alfa Romeo decided it was time to re-enter the market for luxury/executive class cars with a new range designed for the growing number and prosperity of potential customers. Thus, the first models in the new 2000 series emerged, followed by the 2600 series in 1962. That they were not hugely successful, although some 18,540 were manufactured between 1957 and 1966, can be attributed to a number of factors, principally cost. Largely ignored for many years, these cars are now recognized as a significant element in Alfa Romeo's history and this book is a valuable record of their story. Richly illustrated with over 200 colour and black & white photographs, this book introduces the history of the company and its early de-

signs; describes the early Berlina saloon, Spider convertible and Sprint coupe, and their development into the 2600 series; details the evolution of the 1900-based engine into the 6-cylinder 2600 engine; provides a history of the SZ Sprint Zagato; includes information on prototypes, show specials, specification tables, colour schemes and production numbers and, finally, includes a chapter on owning a 2000 or 2600.

Drucker skillfully traces the development of this critical position, suggesting a methodology closer to the actual practices of the early avant-garde artists based on a rereading of their critical and theoretical writings. After reviewing theories of signification, the production of meaning, and materiality, she analyzes the work of four poets active in the typographic experimentation of the 1910s and 1920s: Ilia Zdanevich, Filippo Marinetti, Guillaume Apollinaire, and Tristan Tzara. Drucker explores the context for experimental typography in terms of printing, handwriting, and other practices concerned with the visual representation of language. Her book concludes with a brief look at the ways in which experimental techniques of the early avant-garde were transformed in both literary work and in applications to commercial design throughout the 1920s and early 1930s.

The entire stylistic and industrial history of Pininfarina, a true bastion of the "Made in Italy" phenomenon, is contained in this book with its wealth of black and white and colour photos. For almost 90 years Pininfarina has been synonymous with Italian coachbuilding. Some of the most iconic cars in the history of not only Italian but also worldwide motoring have been clothed by a firm that has been recognised as the creator of true works of art. Battista Farina, known as "Pinin", was the master craftsman who in 1930 founded in Turin the "Società Anonima Carrozzeria Pinin Farina". The quality and the beauty of his creations soon established the firm's reputation and well before the outbreak of the Second World War it could boast magnificent bodies on Alfa Romeo, Lancia and Fiat chassis. 1947 saw the presentation of a milestone in the history of Italian design, the Cisitalia 202. Between the 1950s and 1990s the company produced iconic designs such as the Alfa Romeo Giulietta Spider and the "Duetto", the Lancia Aurelia B24 and the Flaminia, the Fiat Dino Spider and the 124 coupé, not to mention the innumerable Ferraris bodied by the prestigious Turin firm that from 1952 had become Maranello's coachbuilder of choice. Numerous 250 GTs, the 250 Le Mans, the 365 Daytona,

the 308 GTB, the Testarossa and the 288 GTO are all Pininfarina-bodied Ferraris. This book recounts the most recent history of this giant of Italian car design with all the latest products realised in particular for the Asian market where the Pininfarina brand has an increasing presence. There is also a chapter devoted to Pininfarina Extra, a brand within the brand, which since 1986 has been taking a 360° approach to design. The full story of this iconic Italian design firm finally told in a single volume.

This volume builds upon the new worldwide interest in the global Middle Ages. It investigates the prismatic heritage and eclectic artistic production of Eastern Europe between the fourteenth and seventeenth centuries, while challenging the temporal and geographical parameters of the study of medieval, Byzantine, post-Byzantine, and early-modern art. Contact and interchange between primarily the Latin, Greek, and Slavic cultural spheres resulted in local assimilations of select elements that reshaped the artistic landscapes of regions of the Balkan Peninsula, the Carpathian Mountains, and further north. The specificities of each region, and, in modern times, politics and nationalistic approaches, have reinforced the tendency to treat them separately, preventing scholars from questioning whether the visual output could be considered as an expression of a shared history. The comparative and interdisciplinary framework of this volume provides a holistic view of the visual culture of these regions by addressing issues of transmission and appropriation, as well as notions of cross-cultural contact, while putting on the global map of art history the eclectic artistic production of Eastern Europe.

Regarding philosophical importance, Edmund Husserl is arguably "the" German export of the early twentieth century. In the wake of the linguistic turn(s) of the humanities, however, his claim to return to the "Sachen selbst" became metonymic for the neglect of language in Western philosophy. This view has been particularly influential in post-structural literary theory, which has never ceased to attack the supposed "logophobie" of phenomenology. "Phenomenology to the Letter. Husserl and Literature" challenges this verdict regarding the poetological and logical implications of Husserl's work through a thorough re-examination of his writing in the context of literary theory, classical rhetoric, and modern art. At issue is an approach to phenomenology and literature that does not merely coordinate the two discourses but explores their mutual implication. Contributions to the volume attend to the in-

terplay between phenomenology and literature (both fiction and poetry), experience and language, as well as images and embodiment. The volume is the first of its kind to chart a phenomenological approach to literature and literary approach to phenomenology. As such it stands poised to make a novel contribution to literary studies and philosophy.

This book analyzes and discusses in detail art therapy, a specific tool used to sustain health in affective developments, rehabilitation, motor skills and cognitive functions. Art therapy is based on the assumption that the process of making art (music, dance, painting) sparks emotions and enhances brain activity. Art therapy is used to encourage personal growth, facilitate particular brain areas or activity patterns, and improve neural connectivity. Treating neurological diseases using artistic strategies offers us a unique option for engaging brain structural networks that enhance the brain's ability to form new connections. Based on brain plasticity, art therapy has the potential to increase our repertoire for treating neurological diseases. Neural substrates are the basis of complex emotions relative to art experiences, and involve a widespread activation of cognitive and motor systems. Accordingly, art therapy has the capacity to modulate behavior, cognition, attention and movement. In this context, art therapy can offer effective tools for improving general well-being, quality of life and motivation in connection with neurological diseases. The book discusses art therapy as a potential group of techniques for the treatment of neurological disturbances and approaches the relationship between humanistic disciplines and neurology from a holistic perspective, reflecting the growing interest in this interconnection.

This book traces the origins of a faith--perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries--the innovative creators of a new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of

the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions: in

1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social jus-

tice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared *The New Republic* hailed it as "remarkable, learned and lively," while *The New Yorker* noted that Billington "pays great attention to the lives and emotions of individuals and this makes his book absorbing." It is an invaluable work of history and contribution to our understanding of political life.
