"Here is a volume that has no parallel. . . . A good reference book for those interested in the details of avian anatomy."--Science Books & Films "A gold mine of facts. . . . Every library and biology department, as well as every birder, should have a copy close at hand."--Roger Tory Peterson, from the foreword One of the most heavily illustrated ornithology references ever written, *Manual of Ornithology* is a visual guide to the structure and anatomy of birds--a basic tool for investigation for anyone curious about the fascinating world of birds. A concise atlas of anatomy, it contains more than 200 specially prepared accurate and clear drawings that include material never illustrated before. The text is as informative as the drawings; written at a level appropriate to undergraduate students and to bird lovers in general, it discusses why birds look and act the way they do. Designed to supplement a basic ornithology textbook, the *Manual of Ornithology* cov-

ers systematics and evolution, topography, feathers and flight, the skeleton and musculature, and the digestive, circulatory, respiratory, excretory, reproductive, sensory, and nervous systems of birds, as well as field techniques for watching and studying birds. Each chapter concludes with a list of key references for the topic covered, with a comprehensive bibliography at the end of the volume.

""Buku ini dibuka dengan teka-teki berikut ini: Produk atau merek apa yang paling sukses di dunia semenjak adanya planet bumi ini? Coca Cola? Apple? Microsoft? Facebook? Gatot Kaca? Semua jawa-

ban di atas benar. Namun, yang lebih benar dan tak terkalahkan kesuksesannya adalah.... AGAMA = Religion & Spirituality! Agama sebagai sebuah ""produk"" dengan berbagai ""merek""-nya memiliki umur yang paling lama. Semua konsumennya loyal. Mereka selalu menceritakan hal-hal baik tentang ""merek""-nya. Kenapa bisa begitu? Apakah karena agama pernah mendatangi agency untuk membuat iklan? Atau apakah karena agama pernah mendatangi media planner untuk minta saran? Tidak. Satu hal yang sama dari semua merek dalam ""kategori produk"" agama adalah: MEREKA TIDAK BERIKLAN. Resepnya cuma satu: ""getok tular"" (dari mulut ke mulut), rekomendasi dari satu orang ke orang lainnya, dari satu generasi ke generasi lainnya, dari satu kelompok ke kelompok lainnya. Efektif? YA! Kredibel? SO PASTI! Konsumen loyal? GAK PERLU DITANYA! Buku ini akan memperlihatkan semakin redupnya kekuatan iklan dan semakin perkasanya ""kekuatan mulut ke mulut"". Contoh-contohnya aplikasinya sangat banyak, sangat inspiratif, dan bisa Anda uji cobakan untuk produk/jasa Anda... ada tips dan trik yang perlu Anda pelajari dan itu disuguhkan di sini

Thanks to the availability of texts on the Web in recent years, increased knowledge and information have been made available to broader audiences. However, the way in which a text is written—its vocabulary, its syntax—can be difficult to read and understand for many people, especially those with poor literacy, cognitive or linguistic impairment, or those with limited knowledge of the language of the text. Texts containing uncommon words or long and complicated sentences can be difficult to read and understand by people as well as difficult to analyze by machines. Automatic text simplification is the process of transforming a text into another text which, ideally conveying the same message, will be

easier to read and understand by a broader audience. The process usually involves the replacement of difficult or unknown phrases with simpler equivalents and the transformation of long and syntactically complex sentences into shorter and less complex ones. Automatic text simplification, a research topic which started 20 years ago, now has taken on a central role in natural language processing research not only because of the interesting challenges it possesses but also because of its social implications. This book presents past and current research in text simplification, exploring key issues including automatic readability assessment, lexical simplification, and syntactic simplification. It also provides a detailed account of machine learning techniques currently used in simplification, describes full systems designed for specific languages and target audiences, and offers available resources for research and development together with text simplification evaluation techniques.

For fans of *Reading Lolita in Tehran*, a true story of forbidden love set against the rich cultural and political backdrop of modern-day Iran. Jennifer Klinec is fearless. In her thirties, she abandons her bland corporate job to launch a cooking school from her London apartment and travel the world in search of delicious recipes and obscure culinary traditions. Her journey takes her to Iran, where she seeks out a local woman to learn the secrets of Persian cuisine. Vahid is suspicious of the strange foreigner who turns up in his mother's kitchen. Unused to such a bold and independent woman, he is frustrated to find himself, the prized only son of the house, largely ignored for the first time. But when the two are thrown together on an unexpected adventure, they discover a mutual attraction that draws them irresistibly toward each other--but also pits them against harsh Iranian laws and customs, which soon threaten to tear the unlikely lovers apart. Getting under the skin of one of the most complex and fascinating nations on earth, *THE TEMPORARY BRIDE* is a soaring, intricately woven story of being loved, being fed, and struggling to belong. *Includes Reading

»Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiry in-

to digital media theory. The journal provides a venue for publication for interdisciplinary research approaches, contemporary theory developments and methodological innovation in digital media studies. The complete collection of “nimble and often hilarious” short stories exploring the cosmos by the acclaimed author of *Invisible Cities* (Colin Dwyer, NPR). Italo Calvino’s beloved cosmicomics cross planets and traverse galaxies, speed up time or slow it down to the particles of an instant. Through the eyes of a “cosmic know-it-all” with the unpronounceable name of Qfwfq, Calvino explores natural phenomena and tells the story of the origins of the universe. Relating complex scientific and mathematical concepts to our everyday world, they are an indelible and delightful literary achievement. Originally published in Italian in three separate volumes—including the Asti d’Appello Prize-winning

first volume, *Cosmicomics*—these thirty-four dazzling stories are collected here in one definitive English-language anthology. “Trying to describe such a diverse and entertaining mix, I have to admit, just as Calvino does so often, that my words fail here, too. There’s no way I—or anyone, really—can muster enough of them to quite capture the magic of these stories . . . Read this book, please.” —Colin Dwyer, NPR

Resumen: En este documento se realiza un estudio comparativo entre diferentes métodos de aprendizaje y descriptores. Para esto se realizó una base de datos con

quinientas imágenes de telas, de cinco clases diferentes que fueron tomadas por medio de un celular Samsung Galaxy Ace S5830, de gama media, el cual cuenta con una cámara de cinco megapixels, con una resolución de dimensión de 2560 pixeles de ancho por 1920 pixeles de alto. Las telas seleccionadas fueron: lino, blonda, es-cuba, velo, acetato. Para obtener las características se plantea tres descriptores utilizando transformadas tiempo frecuencia (transformada rápida de Fourier (FFT), transformada de Wavelet, Transformada de Fourier corta en espacio (SSFT)). Se seleccionaron estas transformadas para las imágenes textiles, ya que al ser capturados por medio de una cámara las señales que aparecen son periódicas, a estas transformadas se les calcula los parámetros estadísticos con medidas descriptivas de centralización (media, moda, curtosis y desviación estándar). Estos descriptores se utilizan como característica para entrenar dos métodos de aprendizaje máquina supervisado, redes neuronales (RNA) y máquinas de soporte vectorial (SVM), los cuales tienen la característica de predecir y clasificar las telas con un margen de error pequeño a partir de los datos...
