SPSS informs us that it used only 57 observations (due to the missing values of mpg and restrictions on the values of rep78). The results suggest that there are significant differences in mpg among the three repair groups (based on the F value of 8.081 with a p-value of 0.001). The means for groups 3, 4 and 5 were 19.43, 21.67 and 27.36.
