127 - MATTEO BENJAMIN

to solve on present-day computers. They include long-range weather and climate forecasting, the modeling of chaotic systems, and the study of protein folding. Proteins are chainlike molecules that fold up into complex three-dimensional structures, but predicting these shapes from the protein's amino acid sequence has proven surprisingly difficult.

Before Viking, home chefs had no options. With Viking, there is no other option. Over the past 30 years Viking has become synonymous with the epicurean lifestyle, developing professionally styled and featured products for every major appliance category
