333 - LAM DRAVEN

Wind Turbine Blades Can't Be Recycled, So They're Piling ...

When they are recycled plastic bags and wraps can made into plastic lumber that is used to make park benches, backyard decks and fences - even playground equipment. They also can be recycled into new plastic bags - and then recycled again. Recycling helps to reduce the number of tires in storage. An additional health risk, tire piles provide harborage for vermin and a breeding ground for mosquitoes that may carry diseases. Illegal dumping of scrap tires pollutes ravines, woods, deserts, and empty lots; which has led many states to pass scrap tire regulations requiring proper management. Tire amnesty day events, in which community members can deposit a limited number of waste tires free of charge, can be funded by state scrap ... Recycled plastic bottles can be turned into all sorts of useful things, not just new plastic bottles. For example, the flakes made from melting plastic can be spun into a fine polyester fibre, which can be used to make fleece clothing, carpets and duvet filling. 25 recycled 500-millilitre (17.6-ounce) bottles can make one fleece jacket and five two-litre (0.44-gallon) bottles can be turned into 0.09 square metres (one square foot) of carpet.
